

**Senior Airport Planner – Environmental CEQA
Sacramento and/or San Francisco, CA**

We are seeking an Experienced Environmental Airport Planning professional to manage a portfolio of Airport development / FAA environmental compliance projects for a well established and extremely reputable 30 years old Airports and Aviation Planning consulting firm.

The ideal individual would have at least 8+ years experience working as a Senior Project Manager overseeing Airport Environmental Compliance (NEPA / CEQA) projects throughout California and the western United States. Although, applicable experience outside the western United States is not a barrier to consideration.

Candidates must have strong project management leadership skills, abilities to interact with governmental regulators, development clients, and manage work revolving around CEQA, NEPA, IS MND, EA's, EIS's, CatExs, noise, and air quality issues as related to airport development and FAA regulations.

This is a portfolio Project Management Leadership role which would have direct responsibility for all environmental compliance responsibilities for a host of development projects. Requires a degree in Environmental Planning, Environmental Science, Engineering or related discipline. ACIP Certification is desired. Beyond technical excellence, this post requires strong written, verbal and interpersonal communication abilities.

The position could be based in any of the organizations 20 western United States branch offices, but would ideally be housed in California at their Sacramento or southern California practice groups. Alternatively, if the individual were senior enough and brought proven contacts they could be function out of one of the organizations other branch offices.

For consideration please forward resume or contact directly:
