

Senior Hydrogeologist - Group Leader

Sequence is seeking a Senior Hydrogeologist to oversee a small practice group on a wide range of environmental compliance related projects throughout the San Francisco Bay Area and Northern California.

The ideal individual would have at least 10+ years of experience in managing and facilitating compliance for water, infrastructure and related projects. Candidates must have previous experience directing project related efforts that include; overseeing project management, budgeting, client relations, and personnel management for hydrogeology, geology, hydrology, hazardous waste, flood control and water resource projects.

Key to this would be providing technical leadership and guidance on CEQA / NEPA compliance, environmental analysis, constraints and preparing EIR/EIS reports with budgets over \$1million in scope.

Requires a degree in Hydrogeology, Hydrology, Geology, Environmental Sciences, Planning, Natural Resources or related discipline. MS degree is desired. Candidates must possess excellent written and verbal communication abilities.

Candidates must have a solid understanding of CEQA/NEPA compliance as related to hydrogeology or geology to be considered.

For consideration, forward resume or contact:
