## **2009 NPDES Stormwater General Construction Permit**

**Tuesday, September 28, 2010, 11:30 am-1:00 pm**

**SPEAKER: Tom Quasebarth – Camp Dresser & McKee Inc.**

Tom Quasebarth is a Vice President with CDM and has over 25 years of experience with stormwater permitting and compliance support. He has been involved with planning, design, and implementation of Best Management Practices (BMPs) to control pollutants in storm water runoff. He is a co-author of the Bay Area “Start at the Source” site design manual for stormwater quality protection.

Mr. Quasebarth will present an overview of the changes to the California State Water Resources Control Board’s NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (the General Permit). The Board’s amended permit was adopted on September 2, 2009 and the new provisions went into effect July 1, 2010. Come learn about the details of the new permit including how it defines construction project risk and the minimum BMP requirements based on a project’s risk level. By the end of the presentation, you will know what all of the changes mean and how they apply to your current work and future clients.

**\*AICP credit pending\***
