Director Of Water Resources - Environmental / CEQA

Location Sacramento, CA, 94203
Salary 100000.00 - 140000.00
Job Type Full Time - Regular
Experience 10-25
Education Required BS
Position ID EB-6200081077

We are seeking a Water Resources Practice Group Leader with 10+ years experience to lead one of California's environmental and engineering consulting firm's water resources practices here in the Western United States.

The Water Resources Practice Group Leader will be responsible for managing the day-to-day operations of the divisional group; as such, we are seeking candidates with a combination of technical, administrative and business development / client relationship skills. The new Director will not only have the understanding of the water, environmental, regulatory compliance and municipal government business, but also possess a strong management skill set to lead a division's growth.

The ideal candidate would have 10+ years experience in leading environmental regulatory projects related to water resources, wastewater and flood control projects, with a strong emphasis on preparing and managing legally defensible EIS's, EIR's, and CEQA/NEPA environmental documentation. This would include developing scopes of work, budgets, contracts, leading project teams, and providing technical oversight on a portfolio of projects in the division. This individual would take a leadership role in conducting business development, marketing and managing client relationships for the firm. They will additionally oversee the group operations through planning, organizing schedules, assigning duties, coordinating and directing staff activities, budgeting office financial resources and mentoring personnel for professional and organizational growth.

Position requires a Bachelors Degree in Environmental Planning, Geography, Biology, or related discipline. MS in Water Resources would be a strong plus to consideration. AICP Planning registration desired. Candidates must possess excellent written and verbal communication abilities.

This position would be ideal for a senior level executive already versed in, or currently running, a water resources or compliance practice group. It would also possibly be a very good fit for a dynamic individual who has served capably in the number two slot of a practice group that is now looking to take on the senior leadership role.

Position is based in Sacramento, California and offers exceptional compensation and benefits.
